

Resource Utility Supply is
Doing more.

Resource Utility Supply Co. provides solutions to contractors, engineers and municipalities.

Resource supplies the products needed for building, repairing and maintaining water and wastewater systems. These integrals serve as part of the required municipal infrastructure to support population and economic growth. Along with material that aids in pollution control, our quality equipment insures a confident installation. Unique products for trenchless application, coupled with Resource's Service Division provides complete turnkey service on a number of water line control needs.

DOING MORE is at the core of every decision at Resource. We believe in building lasting partnerships by listening to our customers, providing innovative solutions through our unique product offerings and consistently providing our signature +1 customer service. We're in business to help you grow your business and with Resource DOING MORE for your company, you can feel confident in bringing your next construction project needs to us.
